## Ar Makr-app

### What is it?

The AR Makr app brings pictures and cartoon characters onto the real world. When you watch through the iPad, you can see both the real world and the content made with AR Makr together.

### Challenge level

The basic use of AR Makr is usually learnt quickly.

However, more versatile use of the application requires more practise.

### Ideas for the classroom:

- Tell a fairy tale or a story using augmented reality.
- Introduce yourself or your friend.
- Build a dream city.
- Present, for example, a historical event using augmented reality.

### Preparation:

- Check that the AR Makr app is installed on the iPad.
- Think about the topic and suitable pictures or characters.
- Import the images into the iPad library.
- Open the AR Makr app and transfer the images to the app.
