

DigiCoach Card

Bitsboard PRO

What is it?

The Bitsboard app allows students to learn from key flashcards on an iPad. It will take the flashcards and build over 30 exercises for that topic. Each exercise has images, texts and sounds. You can create flashcards from your photos or sound recordings. Or you can get the content from a database.

Challenge Level

You need to learn how to use the app at the beginning.

You can quickly and easily make many flashcards.

Students can use the app on their own. Once it's introduced, it's possible.

Ideas for the classroom:

- Practice new vocabulary in class with the kids with Bitsboard.
- You can use the app to learn how to write new words.
- Children can take quizzes to train their memory skills.

Preparation

- Make sure the app is installed on your iPad.
- Check that you have prepared all the flashcards.
- Choose exercises that work well for the children. Ask the teacher for suggestions..
